# How to Access Data

 Erika's Lighthouse Data Center

1 Log onto the Erika's Lighthouse Resource Portal. Retrieve your School or District ID depending on which dataset you want. Your School or District ID is listed on the My Portal homepage.

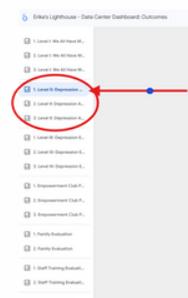

2 On the left hand side, go to Data Center. Click Data Center Dashboard

3 Copy and paste the ID into the corresponding field in the upper right corner on the Data Center Dashboard.

4 All Erika's Lighthouse programs are listed on the left sidebar of the Dashboard. To view results, select the program that was used. Note: You must be on the correct program to see your results.

5 The data will now populate for your school/district. Please note that there are multiple pages of data results. Use the left sidebar to access each page.
